

India enhances day & night surveillance over LAC in Arunachal sector

■ STATE TIMES NEWS

MISAMARI (TEZPUR): India has significantly cranked up its day and night surveillance at the Line of Actual Control (LAC) in the Arunachal Pradesh sector using a fleet of remotely piloted aircraft and other assets as part of a broad strategy to strengthen overall military preparedness to deal with any Chinese misadventure, people familiar with the developments said on Sunday.

As tensions boiled over between the two countries following the Galwan Valley clashes last year, India ramped up its overall deployment along the nearly 3,400-km-long LAC besides speeding up infrastructure development to gain a tactical advantage.

The people cited above said a sizeable fleet of Israeli-made Heron medium-altitude long-endurance drones is carrying out round-the-clock surveillance over the LAC in the mountainous terrain and sending crucial data and images to command and control centres.

Along with the drones, the

Indian Army's aviation wing has also been deploying the Weapon System Integrated (WSI) variant of the Advanced Light Helicopter Rudra in the region, adding more teeth to its tactical missions in the region, they said.

In an expansion of its aviation wing in the region, the Army has come out with an independent aviation brigade in the region this year to bolster its overall operational preparedness in the sensitive region, they said.

They said though the Heron drones were first deployed in the region around four-five years back, now the integration of surveillance has been significantly enhanced under the 'sensor to shooter' concept to employ military forces at short notice for any possible operational objectives.

The deployment of the WSI version of the ALH helicopters has also provided the Army an added advantage to carry out various missions in the high-altitude areas.

Asked about the weapons package of the ALH helicopters, they refused to divulge the details but said it is one of

the best and would be very effective against the adversary.

"Overall, our day and night surveillance capability has seen massive upgrades since last year and we are in a much better position to deal with any eventualities in the region," said one of the people cited above.

The Indian Army is also procuring a fleet of Heron TP drones on lease from Israel that are capable of operating for nearly 45 hours at an altitude of up to 35,000 feet.

The Heron TP drones are equipped with automatic taxi-takeoff and landing (ATOL) and satellite communication (SATCOM) systems for an extended range.

They said additional roads, bridges and railway infrastructure are being built in the Arunachal sector considering their strategic requirement in the wake of evolving security dynamics in the region. The government is also working on connecting 'Tawang with a railway network as part of the decision to enhance infrastructure in the region.

The people cited above also said that infrastructure at almost all airfields along the LAC including the Advanced Landing Grounds (ALGs) was enhanced as per operational requirements.

The eastern Ladakh border standoff between the Indian and Chinese militaries erupted on May 5 last year following a violent clash in the Pangong lake areas and both sides gradually enhanced their deployment by rushing in tens of thousands of soldiers as well as heavy weaponry.

The tension escalated following the deadly clashes in Galwan Valley on June 15 last year.

As a result of a series of military and diplomatic talks, the two sides completed the disengagement process in the Gogra area in August and in the north and south banks of the Pangong lake in February.

However, the last round of military talks on October 10 ended in a stalemate.

Each side currently has around 50,000 to 60,000 troops along the LAC in the sensitive sector.

■ STATE TIMES NEWS

CHANDIGARH: Three people allegedly involved in the lynching of a labourer at a farmers' protest site near Singhu border were remanded to six days in police custody on Sunday as the Haryana Police set up two Special Investigation Teams to probe the incident.

So far, four people have been arrested in connection with the gruesome killing. Narain Singh, a member of the Sikhs' Nihang order, was arrested on Saturday from near Amritsar. Two more Nihangs, Govindpreet Singh and Bhagwant Singh from Pitegarh Sahib, "surrendered" on the same day before the Sonipat Police in connection with the lynching. The three accused were produced before a court in Sonipat which remanded them to six days in police custody.

The police sought remand of the accused on the ground that they have to reconstruct the scene of the crime, recover weapons and clothes of the accused, besides interrogating

them in detail about the entire incident.

One SIT headed by IPS officer Mayank Gupta, who is the Assistant Superintendent of Police, Kharkhoda, Sonipat, will investigate the videos of the incident which were circulating on social media.

The second SIT led by Deputy Superintendent of Police, Sonipat, Virender Singh will carry out the overall probe into the case.

The victim's family had earlier questioned the attackers' claim that he committed sacrilege and demanded a high-level probe into the case.

The mortal remains of the victim, Lakhbir Singh, were cremated at his native village in Punjab's Tarn Taran district amid tight security in the presence of his family members on Saturday evening. Sarabjit Singh was the first to be arrested on Friday for the brutal killing of Lakhbir Singh. He was produced before a Sonipat court on Saturday and remanded in police custody for seven

days. Hours later, Narain Singh was arrested by the Amritsar Rural police at Amarkot village in Amritsar district, police had said. He was brought to Sonipat by the Haryana Police early Sunday.

Narain Singh while talking to the media before his arrest in Amritsar, was unrepentant and said that Lakhbir Singh had been "punished for sacrilege". According to the Sonipat police earlier, Sarabjit Singh claimed that a few more people were involved in the killing
