Poem — Faith For Being

Zillions of people around with fantasies and dream
Thousands of thoughts and ample for being supreme
Sometimes they raft here sometimes there
Though tens of them get satisfied while others bear

Hundredths of them actually reach to that aim
Who know the essence of life nothing alike a game
Beginning casual, critical but end should be loud
It's for those people, making their names proud

How well the idoms have have been fashioned by elders
Do something that makes your name known alike boulders
Breaking through craggy lands and conquering every pain

We should lag to prefer excuses though seeking ample gains

Faith on our being should be fundamental priority
Finding ourselves in corridors of embrace abiding anxiety
The era is also heading towards strange abode
We cultivate faith in humans even more than in God

By this sometimes we find dark till infinite
Plenty of things still beyond talk needs to be unite
All these blind faiths will be alright and fade wraith
From the day we trust our being and God's faith.

Jugesh Singh Thakur, Geology, University of Jammu

Poem — Corruption

Corruption- the people of narrow thought,
Anti-Corruption-the people of broad thought.
Corruption is a kind of disaster that results in shame,
The evil never care for helpless but their name.

Nepotism, Cronyism, Embezzlement, Extortion,
Corruption sells the conscience of a man to auction.
The virtue of honest sigh them a relief,
The vice of corrupt feel them of a thief.

Corruption-the wickedness an evil of one type,
Only the disheartened can express in gripe.
A student visit an office when, Wait! said by the officer if then.

Waiting for hours in "No". Where an individual then can go.
Not getting a particular job, Corruption takes the people to rob.
For the work to be done, Bribe is the payment of bone.

Poor suffer, helpless disheartened and the intelligent struggle,
Corruption the cause of these - the evil like smuggle.
Will this corruption come to an end!
It can end when thought of the people will mend!

To end this evil at grass-root level,
By slapping the corrupt who are devil.

Rajat Kumar, Ph.D Scholar, University of Jammu.

CAREER AID

Forensic Science

Forensic science is primarily concerned with the application of scientific principles for the investigation of crime. Using the very latest in technology, forensic scientists convert the clues collected from a crime scene into evidence admissible in a court of law. It is the use or application of science in courts or legal proceedings. This is a challenging and interesting field for those who have an inquisitive and loves adventure.

Forensic Science is essentially a crime laboratory-based profession, the course qualifies students to apply their knowledge of science to the investigation of crime. But the expertise of a forensic professional is also used in civil cases for issues like proving the validity of a signature on a will, to a claim of the product liability, to find out whether an industry is complying with environmental rules.

Forensic scientists analyze all physical evidence found on a victim on the scene of a crime and compare it to evidence found on a suspect and provide expert testimony in a court of law. The evidences might include traces of blood, saliva, other body fluids, hair, fingerprints, footwear and tire impressions, explosives, specimens of tissue for poisons, blood and urine for alcohol etc. Their expertise lies in the determination of facts using these evidences. They have to prepare a report of their investigation and appear in the court to give evidence. They work closely with the police to provide scientific evidence that is admissible in the court.

Educational Qualification:

Candidates with a background in science subjects can pursue a career in forensic science. One can do graduation in forensic science (i.e. B.Sc. Forensic Science) after 10+2. After graduation they can take up diploma courses in Forensic Science & Criminology which is of 1 year duration. To take up a masters course in forensic science you need to be a graduate preferably with a first division in Physics, chem-

istry, zoology, botany, biochemistry, microbiology, B.pharm, BDS or applied science.
To become a specialist who conducts post-mortems on dead bodies to find out the cause of death, you must first secure an MBBS degree and then go for an MD in Forensic Science. All Indian Universities that offer MBBS courses also offer an MD in Forensic Science.
