Poem — Life is What?

Life is full of struggle
We face too much trouble
Don't take too much stress
Make your mood refresh.

Life is a long journey
So spend it with ceremony
Enjoy every little moment
Try to give your hundred percent

Life has so many colour

Put every colour with fervour
Each colour teaches you something
Take it easy and stop overthinking

Life is a feeling
Don't make it a dealing
Listen to your heart
And live it like an art

Life is a vehicle
Which shows you obstacle

So don't let yourself weak
And try to reach at the peak

Life is a beautiful dream
Enjoy it like a gleam
Fulfill it with sweet memories.
And treat it like your own families.

Sofia Jangral

Poem — Resolution

Let us welcome Happy New Year -2022 wishing all tension free
Let us resolve to make Planet Earth all sorts of pollution free
Let us initiate Jan Abhiyan atleast one plant one space free
Let the farmers be awared to make their fields chemical fertilizers free

Let them be advised to adopt conventional way of
farming to be diseased free
Let there must be as alternative as any otherorganic farming to be farmers
mentally free
Let the scientists be called upon to invent other alternatives in this world to
be plastic free

Let us save the planet's ecosystem balance and
environmental destruction free
Let the blue world from the menace of plastic pollution to be savior free
Let us protect all water bodies making them neat and clean free

Let us not put night soils and sewages into them to lose their sheen free

Let us also take resolve to make Mother Earth with forest cover green free
Let us achieve goals for our country for sustainable developments free
Let us recall the front workers dedication paying homages to the departed
noble souls

Let us not forget wearing masks , frequently washing hands maintaining
social distancing to be ignoring such carelessnesses' fouls

Let us say always bye-bye to the year 2021 which
prevented us from meeting free
Nature has created our Mother Earth to be habitable nicely free

Let all of us always must learn to be enjoyed on its living wisely free
Let us not make celebrations of HNY-2022 with lighting crackers' spree free
Let us say bye-bye COVID-19 New variants delta ,
Omicron not to show their faces free.

Tara Chand Bhagat.

CAREER AID

Jewellery Designing

Jewellery - something which always charms us - has a great economic significance in the Indian Industry and is regarded as a major source of investment. Women has always had an affinity towards jewellery and Indian women has adorned herself with precious jewellery, gold and diamonds to enhance her feminine beauty from time immemorial. India, is the biggest consumer of gold with 20% of world gold consumption and this industry gives employment to millions of people. Indian jewellery industry is said to have an ancient and historical tradition of over 5,000 years with its own distinct designs, patterns and art forms.

For centuries, the art of making jewellery has been the monopoly of traditional 'kaarigars' or goldsmiths who have inherited the expertise from their ancestors and have played the dual role of designer and manufacturer. During those days, jewellery designing as a career had been limited to the kaarigars and one could learn this profession only by becoming an apprentice to an experienced jeweller. But today with the explosion in the fashion and accessories arena, the field is becoming a lucrative career which offers a sparkling future for those who are fascinated by gems and jewellery. A new breed of jewelry designers and professionals like gem appraisers are in great demand with the growing market for branded ornaments.

Jewellery designing is an art of designing and making jewellery, stone cutting, engraving and polishing etc. Jewellery designers are those who plan the style and pattern of jewellery, silverware and other decorative metal work products. They require a high degree of skill and precision and use a variety of specialized hand tools and equipments to design and manufacture new pieces of jewellery. In addition, to be successful in the field they should be able to understand the market, identify the consumer needs, visualize ideas to suit the

demands and create impressive presentations to communicate the end product to the client.

Eligibility:

A course in Jewellery designing is a comprehensive one, dealing with all the fine details of jewellery making and designing. Specially meant for those who are creative and have an artistic blend of mind, these courses give basic information on the different kinds of stones, colour coding, schemes, polishing and finishing, presentation and framing, drawing techniques, ornament making and designing and so on.

For Diploma, Degree and Certificate courses in Jewellery designing, one should have passed 10+2 or equivalent examination from any stream of a recognised institution. Several short term courses are offered for those who have completed their 10th class. Before qualifying for the course, a student

has to pass an aptitude test followed by an interview. Crash courses are also offered to the working professionals and students.
