JAMMU: Jammu and Kashmir bowlers once again showed discipline by reading the surface well and hitting good areas, to restrict formidable Karnataka to 268/8 in 90 overs at stumps on day-1 of the Ranji Trophy Elite Group-C match at IIT Chemplast, Chennai on Thursday.

Earlier, winning the toss and batting first, Karnataka lost opener Devdutt Padikkal early in the innings at his individual score of 8 runs and the team's total of 10 runs in 2 overs.

Padikkal was caught by Abdul Samad after the bowling of left-arm seam

bowler, Mujtaba Yousuf.

Then another opening batsman Samarth R was joined by Karun Nair in the middle and the pair took the score to 108 runs in 29.4 overs, thus making a partnership of 98 runs, before right-arm leg-spinner Abdul Samad got rid of Samarth R at his individual score of 45 runs off 74 balls studded with 5 delectable boundaries.

Karun Nair remained unbeaten on 152 runs off 267 balls, studded with 21 fours and one six. He was

there for the whole day except first two overs.

For J&K, Parvez Rasool, Mujtaba Yousuf and Umran Malik shared 2 wickets each

Compost formation workshop organised by NSS unit of GGM Science College

NSS volunteers posing with faculty members.

■ STATE TIMES NEWS

JAMMU: NSS unit of Govt. Gandhi Memorial (GGM) Science College organized a workshop on Compost formation under the patronage of Principal Dr. Ravender Tickoo and guidance of NSS PO Dr. Deepali Mahajan as a part of seven day winter special camp.

Creating a compost pit at home requires burying kitchen or soft yard waste, such as chopped leaves or grass clippings, in a simple pit or trench.

After a few weeks, it will convert to the organic matter into

usable compost.

The resource person Dr. Deepak Pathania, Assistant Professor Dept. of E.V.S S.P.M.R College demonstrated the compost formation in the college campus.

When turned into compost and fed to plants and vegetables, cow manure becomes a nutrient-rich fertilizer.

It can be mixed into the soil or used as top dressing. Most composting bins or piles are located within easy reach of the garden.

Cattle manure adds significant amounts of organic

material to the soil.

Compost is well decomposed organic wastes like plant residues, animal dung, and urine earth from cattle sheds, waste fodder etc.

NSS volunteers under the supervision of Dr. Deepak Pathania collected the bio degradable waste from the campus. Firstly they made slurry of the cattle dung with water.

Preparing layers of organic wastes - plant residues, sweepings from the cattle shed, waste fodder, dried plants stalks and leaves etc. and sprinkle water to just moisten it. Add microbial enzyme to it Close the pit with cover. Keep it for 20 days. Mix it after 20 days. The manure will be prepared after 20 days.

The students were motivated to make compost at home by the kitchen waste. The Principal appreciated the efforts of NSS volunteers and PO for their zeal to adopt good eco habits.
