Talent Corner

Poem —— A Blessing for everyone - FATHER

Your smiles are my strength ,
I've got hope through them .

Your heartbeats are my life ,
I've got a reason to live through them .

Your wishes are my prayers ,
I want all of them to be accomplished through me .

Your presence is a lamp ,
I've acquainted with light in the dark phases of life, through it .

Your support is my motivation,
I've got the spirit to achive my goals through it .

Your scoldings are my lessons ,
I've got moral sense through them .
Your hug is my safe corner,
My heaven resides in that .

Thank you for always being there for me
" HAPPY FATHER'S DAY "

Mannat Sabharwal.

Poem —— Smile, All the While

A smile is the most beautiful precious gift given to us by God and by nature.
We can reach anyone's heart with a smile.
Not only that,we can change our life and that of others,too,with just a smile.
In a state of angry fearful depressed and stressful life one cannot be able to be smile.

Having negative thoughts in mind one cannot smile.
So,learn to be positive to be smile.
Children and sick people are advised smile five times in every hour.
Smile kills negative thoughts and brings positive ones.
Seize the present only and forget past in order to be smile.
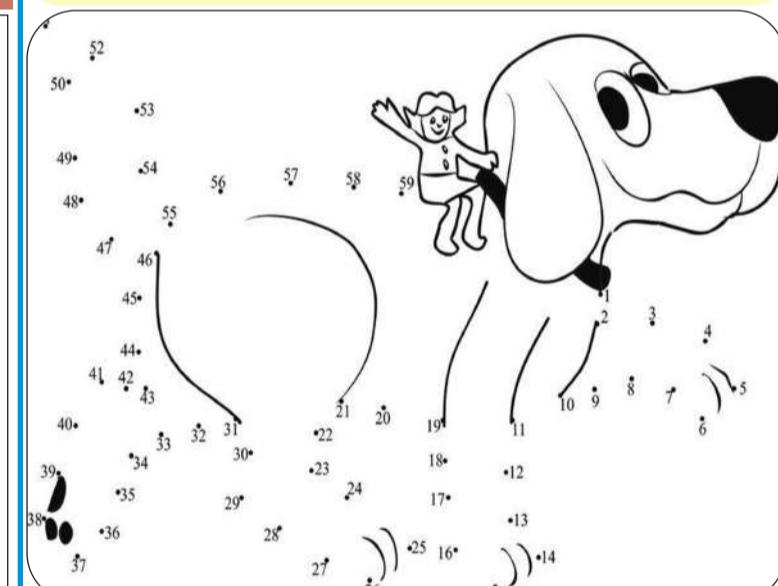

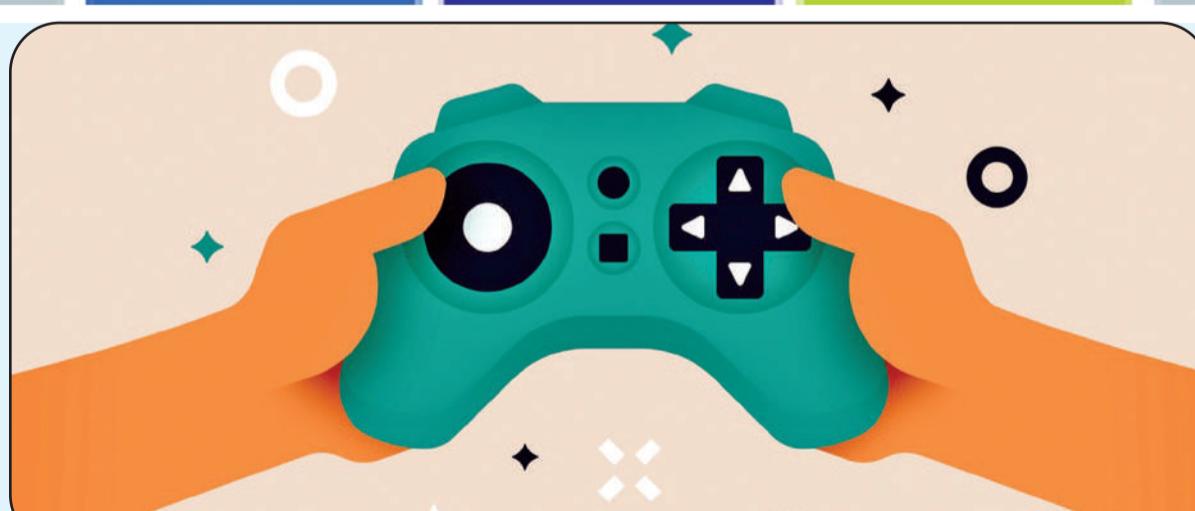

Tara Chand Bhagat.

Gaming Industry

Making a video game is just not easy as playing a game. Designing a game is a long, multifaceted process which involves the combined effort of a team of professionals with a unique mixture of creative and technical skills. It is one of the most complex part of software development which involves various aspects of development of the game like- outlining the concept, documenting rules and principles, development of graphics and so on.

Gaming is one of the largest segment of the entertainment industry and a multi billion dollar one, flourishing widely across the world. It has become one of the most highly sought after career in today's modern world with the growing demand for computer, mobile and video games. Wide access of internet has also created a huge demand for online games, and with the advent of greater technology, this industry is growing at a firm, fast pace. Gaming as such started with classic video games in 2D, but early 2000 saw the development of the more popular 3D platform. But 2D game design software has seen a revival in recent times following the development of mobile apps.

Designing is the key aspect of developing games, and it is done by a team of skilled individuals including game designers, programmers, engineers, writers, artists, producers and other staff. Each individuals work profile may vary according to their designation, but they work as a team to create video and online games, using techniques in illustration and animation, 3D and 2D design, storytelling, graphic design, web design, interactive media, digital production and more. They should have an awareness or working knowledge of programming, fine arts, framing and even software development.

The game industry is rapidly changing on a daily basis and more and more new games are being invented. Hence numerous opportunities are available in gaming industry for those who want to be part of the excitement of creating video games. But for obtaining a job one must be highly skilled and talented, as the employers strongly weigh talent, and demonstration of applied knowledge. Overall, Gaming Industry is growing into a lucrative and happening career for youngsters, who posses heavy coding and programming skills along with a passion for game and creativity.

Educational Qualification:

Relevant educational qualification in the fields of animation, graphic designing, game designing/ technology etc. is necessary for obtaining an excellent career in gaming industry. Those interested in pursuing a career in gaming industry, should focus on gaining awareness with computer programming in an object-oriented language such as C++ or Java, from their high school level, so that they can build a bright future for themselves.

Several certificate and diploma programmes in game designing are offered by various institutions. Advanced Diploma in Game Design; Diploma in Game Design and Gaming; Video Game Design and Development Certification; Video Game Design and Development etc. are some among the courses. The minimum eligibility required for most of these courses is 10+2 or its equivalent. For becoming a Game programmer, one should have B.E/ B.Tech degree in computer engineering. Online programs are also available in game design and animation. Those with an inborn desire to learn gaming and excellent technical skills can excel in this field.
