Poem — Struggle

Struggle is the most precious phase of life,
You'll remember it till you survive.
While struggling, there's no one behind your back,
Because usually, in struggling, support lags.

But, when you finally achieve it,
Then everyone, close or far, would start to believe it.
You have to struggle all alone,
This makes you realise that when you have nothing, there's no one.

While struggling, you start to hide things from people,

As you think that they would make you feel dull.
It's then, that you realise all those are fake people,
Who will spend lakhs on you when you have lakhs, but in the
phase of struggle they all will repel.

Learning and struggling goes hand in hand,
Because Success does not come with a magical wand.
All successful people have struggled in their lives,
So, don't get confused with their pretty smiles.

Mannat Sabharwal

Poem — Smile, All the While

A smile is the most beautiful precious gift given to us by God and by nature.
We can reach anyone's heart with a smile.
Not only that, we can change our life and that of others, too, with just a smile.
In a state of angry fearful depressed and stressful life one cannot be able to be smile.

Having negative thoughts in mind one cannot smile.
So, learn to be positive to be smile.
Children and sick people are advised smile five times in every hour.
Smile kills negative thoughts and brings positive ones.
Seize the present only and forget past in order to be smile.

Forestry/ Wildlife

Forestry is an important and interesting subject of study. Forests form part of the vital natural resources of a country. From time immemorial forest resources have been a source of human sustenance. They are home to the most amazing herbs, medicinal compounds, natural cosmetics etc. Forestry and Wild Life go together since forests serve as home for wildlife.

Forest wealth also contributes significantly to the economy of the country. Specially trained personnel are therefore needed to maintain and regenerate the forest cover, forest wealth and resources. This involves the services of forestry specialists, forestry management experts and forest officers.

Forestry involves protection of forests and farming of trees to ensure contributing timber supply. Forester takes care of forest resources by protecting them from fire, pests, disease, encroachment and indiscriminate felling of trees.

Educational:

Various courses in forestry are available, at the graduate, postgraduate and diploma level, as well as at the Ph.D. level. Those with Physics, Chemistry and Biology at the intermediate level can go for B.Sc Forestry course. Further the masters level offers specialisation in subjects like Forest Management, Commercial Forestry, Forest Economics, Wood Science & Technology, Wildlife Science, Veterinary Science etc.

The Indian Institute of Forest Management (IIFM), Nehru Nagar, Bhopal offers a study programme in Forest Management. There are also opportunities for doing Ph.D in Forestry at the recognised centres. Those with Bachelors degree in related subjects can appear for Indian Forest Service exam conducted by Union Public Service Commission.
