

PM Modi leading global climate movement: Dr Jitendra

■ STATE TIMES NEWS

DEHRADUN: Prime Minister Narendra Modi is leading the global climate movement and the world is ready to be led by India in its fight against climate change- a concern that like the COVID pandemic; knows no borders, respects no wealth or any other artificial human division. The responsibility to equip us to fulfill this leadership role lies on the shoulders of women and men of our scientific community.

The Union Minister Dr Jitendra Singh made this statement while addressing scientists at the Indian Institute of Petroleum at Dehradun on Sunday.

Dr Jitendra said that it was a happy coincidence on the World

Environment Day that he was at an institution that represents the commitment of a modern and new India to protect the environment and find alternate indigenous sources of energy.

The Union Minister said that the last 8 years have witnessed the Indian crusade against climate change. We have already achieved our commitment of 40% energy production from renewable sources, way ahead of the 2030 Paris Agreement target.

The Union Minister urged the scientific community to work towards making it a mass movement. Dr Singh said it must dawn on our people that they can make Rs 30 per litre from a waste cooking oil that they routinely throw out.

The Minister added that we

know now that we throw out more carbon than we need for our energy. Innovative ways to use this waste would meet the twin goals of 'Atmanirbhar Bharat' and 'Make-in-India'. The curiosity engendered in the masses would lead to awareness

and that will lead to the application of science and ease of living.

The Union Minister called on the scientists to work closely with their stakeholders in government agencies and private entities. He said that it has

become a practice in the Union Government to hold inter-ministerial meetings to create synergy.

However; he cautioned that we must not remain limited to IT-enabled services and that we must be open to the untapped

opportunities in the Agrotech sector.

He concluded by saying that, as we look towards the centenary of our freedom 25 years from now, we must work for the cause of generating clean energy cost-effectively.
