Poem —— Dogron ki Dharti

Dogron ki dharti, yeh Jammu dharti,
Badi sunder dharti, meri pyari dharti,
Mere naanu ki dharti, Jammu ki dharti.

Raja Jambu Lochan ne, Jammu shahar basaayaa thaa,
Uske bhai Bahu Lochan ne, Bahu Fort banaya thaa,
Maharaja Gulab Singh ne, Duggar desh basaaya thaa,
Maharaja Ranbir Singh ne, Dogri ko,
rajya bhasha banaya thaa.

Jammu ki dharti, Dogron ki dharti,
Meri pyari dharti, mandiron ki dharti.

Raghunath ji ka vishal mandir, bahut hi pyara hai,
Ranbireshwar mandir ka Shiv ling, bahut hi nyara hai,
Bawe wali mata devi ka, ham sab par vardaan hai,
Peer-kho gufa ke Shiv ji, poore Karen armaan hain.

Jammu ki dharti, Dogron ki dharti,
Meri pyari dharti, teerthon ki dharti.

Vaishno Devi ji di dhakki, badi suhani lagti hai,
Adh-kwari, bhairon-ghati ho kar,

bhawan me jaa kar milti hai,
Purmandal, Sudh-mahadev,
Shiv-khodi teerath mahan hain,
In pracheen teerthon me,
Shankar Bhagwan ji pradhaan hain.

Jammu ki dharti, Dogron ki dharti,
Meri pyari dharti, khelon kidharti.

Gulli-danda, baante khel ke, guddiyen badi udate hain,
Kushti, dangal, kaudi me, ek-doosre ko girate hain,
Rajmaa, choul, ambal, maani, kyoor ye khate hain,
Kladi, kulcha, babbroo, auriyaa,
khamire inhain lubhate hain.

Jammu ki dharti, Dogron ki dharti,
Meri pyari dharti, badi mithhi dharti.

Sangeet-premi yahan ke maanu,
khand mithe hain Dogre.

Dashea Aravind,
Student of 6th Standard, Army School, Dhinjan.

CAREER AID

Gaming Industry

Making a video game is just not easy as playing a game. Designing a game is a long, multifaceted process which involves the combined effort of a team of professionals with a unique mixture of creative and technical skills. It is one of the most complex part of software development which involves various aspects of development of the game like- outlining the concept, documenting rules and principles, development of graphics and so on.

Gaming is one of the largest segment of the entertainment industry and a multi billion dollar one, flourishing widely across the world. It has become one of the most highly sought after career in today's modern world with the growing demand for computer, mobile and video games. Wide access of internet has also created a huge demand for online games, and with the advent of greater technology, this industry is growing at a firm, fast pace. Gaming as such started with classic video games in 2D, but early 2000 saw the development of the more popular 3D platform. But 2D game design software has seen a revival in recent times following the development of mobile apps.

A career in Gaming, is an exciting but a highly competitive field with a combination of technology, creativity and fun. It is also an amazing and interesting career for those individuals who dedicate their lives for creating new and improved games.

Designing is the key aspect of developing games, and it is done by a team of skilled individuals including game designers, programmers, engineers, writers, artists, producers and other staff. Each individuals work profile may vary according to their designation, but they work as a team to create video and online games, using techniques in illustration and animation, 3D and 2D design, storytelling, graphic design, web design, interactive media, digital production and more. They should have an awareness or working knowledge of programming, fine arts, framing and even software development.

Eligibility

Relevant educational qualification in the fields of animation, graphic designing, game designing/ technology etc. is necessary for obtaining an excellent career in gaming industry. Those interested in pursuing a career in gaming industry, should focus on gaining awareness with computer programming in an object-oriented language such as C++ or Java, from their high school level, so that they can build a bright future for themselves.

Candidates who wish to make a career in game designing should be innovative, creative, systematic, dedicated and have a clear understanding of common game mechanics and game play theory. One should possess the art of sketching or drawing and have a sound understanding of anatomy of humans, animals or birds and body movements and lighting effects.
