### Poem — Curse

Poverty is a curse; Slavery is a curse.  
Cruelty is a curse; Mob-lynching is a curse.  
Ignorance of knowledge is a curse.  
Unemployment among youth is a curse.

Non-cooperation to rules of the country is a curse.  
Killing of bovine animals is a curse.  
Drinking , smoking and chewing tobacco is a curse.  
As its enjoyment carries a sense of social evil .

Not helping the helpless , needy ones is a curse.  
Suffering with deadly disease of cancer is a curse.

Not taking pity upon handicapped is a curse.  
Spreading false rumours in the country is a curse.  
Disobeying to the orders of teachers , gurus and parents is a curse.  
Using horses / mares for driving tongas / rehras is a curse.

### Poem — I Love myself

I want to see the clouds move, And see the stars die down,  
I want to smile, sing and groove, See the butterflies and lie down.

Living alone, having fun, Satisfied when the day will be done  
I'll watch the river passing by,  
And check out the palace of Versaille.

My actions will be magic, My emotions, manic  
At the end of the day there'll be no one  
And sadly that'll be tragic.  
But I'll enjoy the ocean's company.

And I'll have two puppies, One rainbow colored bunny  
And the monkeys as my buddies!

I'll be the mermaid, Of my sole ocean  
I'll collect the pearls, And show no emotion.

I'll be the pretty witch, Flying during the wake of night  
I won't have a single care, Not even caring about the red light.  
I'll be the Muggle blooded Granger  
I'll be the danger, And at dawns, I'll search for a stranger.

Where I'll get what I yearned, And I'll love what I learned  
I'll love myself, what I have,  
Yes, That will be my perfect world.

### Pharmacy

Pharmacy or Pharmacology is one of the main disciplines under Biomedical Science and the pharmaceutical industry. There are many disciplines within the Biomedical sciences.

Pharmacy is related to health sciences. It is the profession responsible for the preparation, dispensing and appropriate use of medication and which provides services to achieve optimal therapeutic outcomes. A Pharmacists job is to prepare, mix, compound or dispense drugs and medicines, ointments, powder, pills, tablets and injections on the prescription of a medical practitioner, dentist or veterinarian. In detail, they are concerned with production of pharmaceutical products, development of the methods or processes of production and quality control. Those in research concern themselves with synthesis of new drugs (what is commonly referred to as molecules), new processes, clinical testing of the effects of such drugs on animals and humans, and obtaining the required License from the drug control authorities. A pharmacist is required to explain the mode and precautions regarding the use of medicines dispensed in a hospital pharmacy, prepare special formulations normally not available in the market, assist the physician in rendering necessary information about various drugs, their contra-indications, incompatibility etc.
