### Poem — Only they are mine — My Parents

When everyone is there, concerned with their own lives,  
Only they are here with me,  
Not concerned about themselves,  
But with my life only.

When everyone is against me,  
Only they are with me,  
And as they believe me and know me well,  
Are enough against any number of people against me,  
And also prove me,  
Transforming all people to be in favour of me.

When everyone hates me,  
And have hatred for me,  
Their love is enough to heal me,  
And even making them to love me.

When everyone fires on me with their weapons,  
They emerge as a magical invisible shield,  
Not worried about themselves,  
But safe guarding me only.

When everyone breaks my heart,  
And I am just to die,  
They become my heart line,  
And blessing me to live cheerful long life.

When everyone make fun of me,  
Which discourages me,  
They improve and motivate me,  
And tell me my drawbacks,  
Which everyone notices,  
But enjoys scene as their source of laugh and enjoyment.

When everyone watches the end, final result,  
It only I know,  
Their hard work behind me,  
And the appreciation which they deserve and not me.

Who am I?  
I am just a new one,  
They are experienced,  
But no one can imagine how will I emerge in future,  
But they are indulged in me only,  
Doing everything for me, more than they can.

With the grace of God,  
Really, they are mine,  
A great salute to them for their contributions for me,  
And I am blessed to be their son,  
My life is fine with them only.

Sahaj Sabharwal  
B.E Aeronautical student.

## CAREER AID

### Pediatrics

**P**ediatrics is a division of medical science, which deals with the health care of newborns, children and adolescents. In other words, Pediatrics is a specialized area in medicine that focus on diagnosis and treatment of children's diseases. Those who specialise in this medical field are known as Pediatricians.

Pediatricians are qualified children's physicians who have undertaken training to specialize in the diagnosis and treatment of disease and care of children. They advice parents on how to take care of their children, administers their immunization and treats illness which mainly affects children. Pediatrics involves caring for children and providing the best medical care necessary to keep them in good health.

Pediatrics field is considered to be a collaborative specialty because it requires pediatricians to work with other medical professionals to ensure the physical and emotional well being of children. Pediatricians deal in the prevention and management of acute and chronic illnesses in children. Pediatricians work include diagnosing and treating injuries, infections and diseases among young patients, as well as counseling them through difficult times and situations to assess psychosocial aspects that may have profound influence on the children. Pediatricians also work for the early detection, prevention and management of disorders in behavior, development and bodily functions.

Pediatrics composed of two main fields: general pediatrics and pediatric subspecialties. A general pediatrician generally treat common illnesses and other diseases common to infants and children, whereas specialists identify interests in other areas as well. They can also super specialize in any of the following fields like endocrinology, gastroenterology, immunology and infectious diseases, oncology, clinical pharmacology, respiratory medicine, rheumatology etc.

Educational Qualification:

To become a Pediatrician you have to first complete your +2 with Science and then you have to appear the entrance exam to get admission for MBBS course into a medical college. After completing MBBS degree from any of the recognized Medical colleges or Universities, one must pursue MD (Doctor of Medicine) in pediatrics. Then you can start your career as a Pediatrician in India. You can further go for further specialisation in pediatric fields like endocrinology, gastroenterology, immunology and infectious diseases, oncology etc. There is always a need for ongoing education for pediatricians as they must keep up with trends and procedures within the field.
