Advisory for Fruit Growers of Jammu Division

In view of the intensive and continuous rains in Jammu Division, fruit growers are advised to follow the below mentioned measures to safeguard Orchards and Fruit plants:

Waterlogging in orchards	Ensure proper drainage by making small channels to drain out excess water. Do not allow stagnation around tree basins.
Tree breakage / fruit drop	Provide support to heavily laden trees (Mango, Guava, Citrus, Kiwi etc.) with bamboo/wooden props.
Broken / damaged branches	Prune and remove broken, diseased, or damaged branches to avoid pathogen entry.
Fungal infections (fruit rot, canker, root/collar rot)	After cessation of rains, apply Copper Oxchloride @ 0.3% or Bordeaux mixture @ 1%. For root/collar rot, drench basins with Metalaxyl + Mancozeb solution or apply Trichoderma formulation.
Insect attack (fruit fly, stem borer etc.)	Regularly monitor orchards. Use traps and apply need-based insecticidal sprays after rains.
Harvesting & storage	Avoid harvesting during or immediately after rainfall. Keep harvested fruits in dry, ventilated conditions; avoid stacking wet fruits.
Chemical sprays	Do not spray pesticides/fungicides during rains. Take up sprays only after 24-48 hours of clear weather.
Field operations General advisory	Avoid movement of heavy machinery/tractors in waterlogged orchards to prevent root damage and soil compaction. Stay updated with weather forecasts and follow departmental advisories for timely action.
